**intrion manufacturing services**  
Quality in one piece

With 150 experts and engineers, **intrion** provides you time and time again with the best solutions in **industrial automation**. From inline checks to robotics and from end-of-line solutions to global logistics projects: **intrion** looks at the bigger picture and guarantees the **most effective and sustainable solution**, based on thorough analysis.

**intrion manufacturing services** not only provides services within a global **intrion** project but also responds to specific requests from companies:

## Quality custom productions

### Something broken or everything new?

From full machine construction to the repair of one micro-part... in our own welding shop, we manufacture and assemble your order quickly and efficiently. Everything is finished with attention to the smallest detail, so it is immediately ready for use.

### Our word is strong as steel

Does your project require more than just milling, turning, or welding? Then we will look for the best subcontractors with regards to both price and service. We are already certain of the delivered quality, because we guarantee it ourselves. So, if a subcontractor does not deliver the quality that **Intrion** manufacturing services stands for, we carry out all the necessary adjustments internally until the product meets all our quality requirements.

---

## Excellence in product and materials handling

### Attractive price

**intrion** manufacturing services is your perfect partner for custom computerized numerical control turning, milling and welding. Thanks to our many years of experience we can quickly carry out the most specific designs and requests at a very competitive price.

«« CNC lathe where turning and milling can be performed with the utmost precision.

### Whatever you need...

Our passionate team uses the most high-tech equipment to turn your innovative drawings into a piece as hard as steel. But our knowhow doesn't only express itself in innovations, we can also perfectly recreate for you existing machinery and robotic parts at an attractive price, more competitive than your OEM-er.

### All in one place

**intrion** manufacturing services has the most specific and sophisticated machinery available in-house. The latest measurement tools provide meticulous quality. You won't even have to look for a third party to provide the necessary raw materials: we can draw from an extensive stock of raw materials that are always ready at hand.

«« 5-axis milling machine that can work on 5 faces in a single setup with very high accuracy.

### Because it has to be perfect

Drawings and parts come alive only when they are actually in use. Which is why our mechanical engineers like to evaluate and measure up the situation in situ. And, if you wish, the service team will come and install, adjust or replace the manufactured items or structures for you. Because perfection is as obvious for **Intrion** manufacturing services as it is for you.
